Item Scoring Guide and Scales

Scoring Instructions. Numbers for each item indicate its location in the administration version, and response categories are (1) disagree strongly, (2) disagree, (3) uncertain, (4) agree, and (5) agree strongly. Scores for each scale are obtained by summing responses to its set of items after reversing scores on reflected items (i.e., designated with ®) by subtracting the item response from “6”, dividing the sum of each scale by number of items included (yielding an average), and multiplying by 10 in order to rescale final scores so they range from 10 to 50 (e.g., an average response of 2.6 for a scale becomes a score of “26”).

A. Family Warmth (7 items)

- 14. Your family often sits down to eat together at the same time.
- 17. You have parents and a family who make you feel loved.
- 18. Your parents often tell you they love and care about you.
